

ROMENGO DROM – the WAY OF ROMA PEOPLE

On June 8th 2013 we founded the Roma Initiative Thuringia. Roma People did never hold a state of their own and thus is looking back on a history of centuries of persecution. The history of damnation of Roma People in German Nazi times never concluded in an adequate socio-political debate although a Roma memorial has been inaugurated in Berlin.

The founding of our initiative is aiming at a better definition of our point of view within the socio-political discourse about the social exclusion of Roma in Germany and as to impeach the ongoing structural refusal of accepting regular asylum applications.

We strongly demand:

1. regular asylum cases for all Roma People!
2. stop deportation and forced “voluntary” exit!
3. life free of persecution and discrimination!
4. abolishment of the “Residenzpflicht”-law!
5. out of the lager! housing with privacy for all!
6. equal accessibility to education and working permits!
7. free access to full medical treatment!

All together we demand for our right of self-determined living!

We want to strengthen the solidarity within the Roma and refugee community as well as within the German society.

Roma Community in solidarity with the "Break Isolation" movement!
Freedom for all Deportation Prisoners!
